DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

1. The prior art teaches a transistor that has a source, a drain, a gate electrode, a gate dielectric layer below the gate electrode and above the channel region, a source electrode, and a gate wiring, but the prior art does not teach the above teachings in combination with the gate dielectric layer on the source electrode and a second insulating layer that is in contact with the source electrode and the gate wiring, where the gate wiring layer is a separate layer than the gate electrode. This combination has been found non-obvious thus novel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Claims 1-51 are allowed.
